

CREATIVE AUDIO-VISUAL SOLUTIONS

Christ Church, Radlett

Discreet Multi-Media Integration

Christ Church, Radlett had many of the dilemmas facing most traditional parish Churches – needing an effective multi-media system and the latest technology whilst ensuring the least aesthetic impact on the Church building. CAVS designed a system based upon a motorised winched projection screen (where fabric and casing hide discreetly behind the arch) with a high powered 7,500 lumen projector and flexible input and output connectivity. This connectivity allows for multiple laptop/device inputs around the building along with multiple HDMI connections for monitors, serving musicians and service leaders.

A touch panel at the main console, negates the need for multiple remote controls to operate the system – for projector and screen operation. A multi-input switching scaler provides ten HDMI inputs (for true future proofing) and ease of use.

A Christie 7,500 lumen projector with 10,000:1 contrast ratio for superb image quality. With HDBaseT and a 4-year onsite warranty, both image and system reliability is fully covered into the future.

Multiple HDMI input and output connections allow for connectivity at four locations along with trolley LED monitors serving musicians and service leaders.

A Kramer touch panel makes operation of the projector and screen simple by negating the need for any additional remote controls. Coloured buttons show equipment status (power on/off etc.).

Creative Audio-Visual Solutions is the leader in Church re-ordering and building projects – with expertise covering audio, visual, networking, CCTV and lighting requirements.
