

CREATIVE AUDIO-VISUAL SOLUTIONS

CAVS at work

Frampton Park Baptist Church, Hackney

New Building Project

Frampton Park Baptist Church was completed in 2015 and features complete audio and visual solutions throughout the building. Within the main Sanctuary, a system was needed to provide full HD visual and concert quality sound whilst allowing the integration of a portable control rack with dual connection points. Two full HD Christie projectors provide excellent image quality along with additional side LED displays – driven via a Kramer VP-774 switching-scaler and touch panel controller. The sound system is comprised of EVF and EVU series Electrovoice speakers and amplification. Recessed floor boxes within the platform provide local XLR connectivity and HDMI monitor outputs for musicians to view projected images without needing to turn to the main screens. LED stage lighting was also installed to allow illumination of the platform for the benefit of the congregation and the full HD Sony remote camera (projection, recording and online streaming).

System pictures showing an Electrovoice EVF12 speaker and lighting system, flexible HDMI and audio connections, a Soundcraft Si Expression digital mixing console and the main hardware rack – containing Electrovoice audio amplifiers and Netmax 8000 speaker controller, Kramer HDMI infrastructure and platform audio-visual patch bays.

CAVS provide the complete new building solution from initial drawings and design, right through to installation, system optimisation, training and the highest level of service and support.
