CREATIVE at work

Hickey's Chapel, Richmond

Cinematic Church Solution

The new audio-visual system at Hickey's Chapel is used both for Sunday services and also many other meetings including a weekly local cinema club. With this in mind, CAVS installed a very flexible projection screen featuring a long-drop screen and discreet long-throw 6000 lumen projector. The screen can be lowered to a 'normal' height for services but drop lower to provide an effective cinema backdrop with the projector's motorised lens shift allowing simple set-up for both configurations. This is wired digitally via HDMI to provide the highest quality images from bluray films. The audio system features JBL Control 28 speakers, ensuring excellent sound quality for both speech, music and cinema playback. The main hub of the sound system is a new Australian Monitor mixer-amplifier featuring 8 inputs, 200 watt amplifier and digital processing (to eradicate feedback and improve clarity and intelligibility) all within a 1U frame!

The hub of the sound system is the new Australian Monitor AMD200 mixing amplifier featuring 8 inputs, power amplifier and full digital sound processing.

Motorised long drop screen allows the screen to be dropped to two operating heights – for main Chapel services and for the popular cinema club. The system also shows Freeview TV channels and has flexible inputs for instruments, laptop and microphones. A truly discreet and flexible AV system.

A discreetly mounted Sanyo 6000 lumen projector with telephoto lens and motorised lens shift.
