

CREATIVE AUDIO-VISUAL SOLUTIONS

Kendal Road Baptist Church, Gloucester

New Church Build

Creative were chosen to provide the new audio-visual and networking infrastructure at Kendal Rd Baptist Church through a personable approach and cost-effective design. The main Worship space features dual 5,000 lumen projectors, remote HD camera and a platform-facing display. The audio system features a full-range amplification system with flexible audio, visual and network connectivity via numerous floor boxes within the platform. These allow up to 32 inputs to be selected depending on service layout with additional laptop/monitor HDMI sockets. The control room features a dual switching-scaler visual system (for main and preview control), Bluray/DVD and CD/MP3/Media recording and playback and Sennheiser radio microphones via an ultra-reliable antenna distribution system.

A Trilite lighting bar was installed for the platform-facing LED display and performance LED lighting. The above picture also shows the dual motorised projection screens and Electrovoice ZX speaker system for effective amplification from full-range Worship music amplification to speech. Floor boxes provide discreet but highly flexible connectivity within the platform for musicians.

A well designed control room, maximising space but ensuring complete control for audio and visual systems
