

CREATIVE AUDIO-VISUAL SOLUTIONS

Trinity Church, Shrewsbury

Multimedia Excellence

Trinity Church, Shrewsbury commissioned CAVS to provide a discreet visual system for complete congregation coverage with the ability to hide all screens for weddings and funerals. A system featuring three smart winched projection screens achieves this and utilising 7,500 and 5,000 lumen projectors image quality is at its highest across all sources. A dual switching-scaler allows any input (such as Blu-ray/DVD or camera) to be previewed before committing images to the main screens. A wireless collaboration system allows any devices from phone to laptop to be connected wireless to the system. Multiple 'comfort monitors' ensure musicians and service leaders can view projected images without needing to turn around. Camera images (with embedded audio from the sound system) are distributed to the foyer and crèche for service relay – with local connections for independent room AV use.

A Christie LW-751i 7,500 lumen projector for the main central screen and Sony SRG-300HW full HD motorised PTZ camera for projection, recording and online streaming.

A Dias comfort screen - allows service leaders and musicians to view all images.

PTZ camera joystick and 10" cue/preview monitor – allows all images to be set-up before committing them to the main projection screens.

High definition camera images with audio is relayed to the crèche LED monitor. A local HDMI input allows the display to be utilised for independent meetings.
